

Main Topic: Multilingual PDF Agent.

This document discusses the development and evaluation of an advanced multilingual PDF constrained conversational agent.

Key Findings:

1. The agent effectively processes text from PDFs.
2. It can translate queries across 40+ languages.
3. Hallucinations are heavily reduced.

The purpose of this document is to serve as a testing artifact for the retrieval system.  
The key conclusions are that the system works perfectly and is ready for production.
